

Function

Back-up rings or Anti Extrusion Rings do not have a sealing function. They are designed to prevent elastic sealing elements of gap extrusion.

Features

- ⇒ Triangular Anti Extrusion Ring for Rod applications
- ⇒ Special housing designs required.
- ⇒ Reduced gap extrusion of the elastomer seal and/or higher pressures up to 700bar possible.
- ⇒ Available as split and non-split version.

Application

Dynamic and static applications in reciprocating rods in hydraulic cylinders, plungers, etc. Unfavourable tolerances and wide gap dimensions.

Installation

Snap-in installation
